

**Heavily  
Nicked**

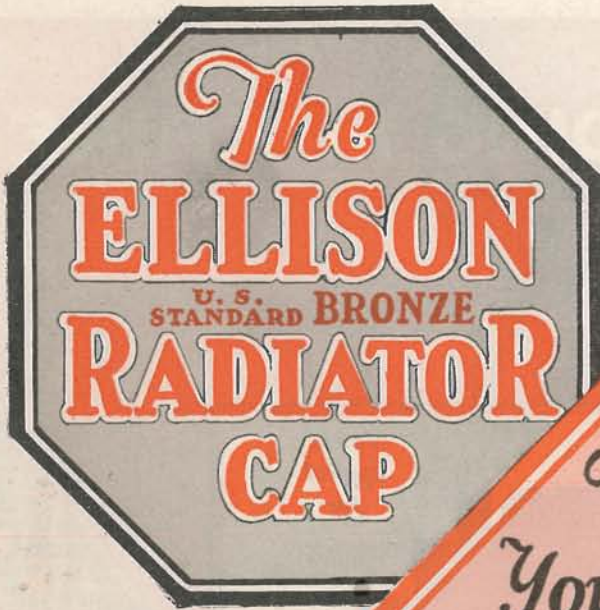

**Strikingly  
Distinctive**

The Ellison Cap tilts clear back, leaving free opening for easy filling, yet Moto-meter cannot strike hood. When closed the wing ball locks it securely.

**It  
Stays  
Sold**

## Here's What Your Customers Want

Here is a distinct improvement in radiator caps. The Ellison Cap is cast solid of U. S. Standard Bronze. It completely prevents trouble caused by the melting of softer metal and consequent clogging of radiators. There is a gain in durable

attractiveness, too. U. S. Standard Bronze furnishes a superior base for the nickel plating. The finish lasts. And when it comes to locking, the Ellison Cap is in a class by itself. It closes the water outlet tightly and securely.

Two sizes:

Large cap	.	.	\$6.00
Junior cap	.	.	4.50
